

The economy in my country has
been improving

People have been caring for the
environment a lot

Medicine has been getting worse

More people have been suffering from new illnesses

In my country, we have been
treating immigrants well

The government has been doing a
good job in my country

Women have been voting for a
long time in my country

Fashion has always been changing
in my country

I have been using public transport
all my life

I have been donating to charity
for a long time

Technology has been improving
my ability to do my job

Technology has been replacing
jobs in my country

People have been eating more
meat recently

My town has been investing lots
of money in commodities

People have been spending more
money recently

Bills have been getting more
expensive

Clothing has been getting cheaper
and cheaper

My city has been experiencing
more tourists lately

My football team has been doing
really well recently

People have been using local stores
more than big branded shops
