

## Parts of the House

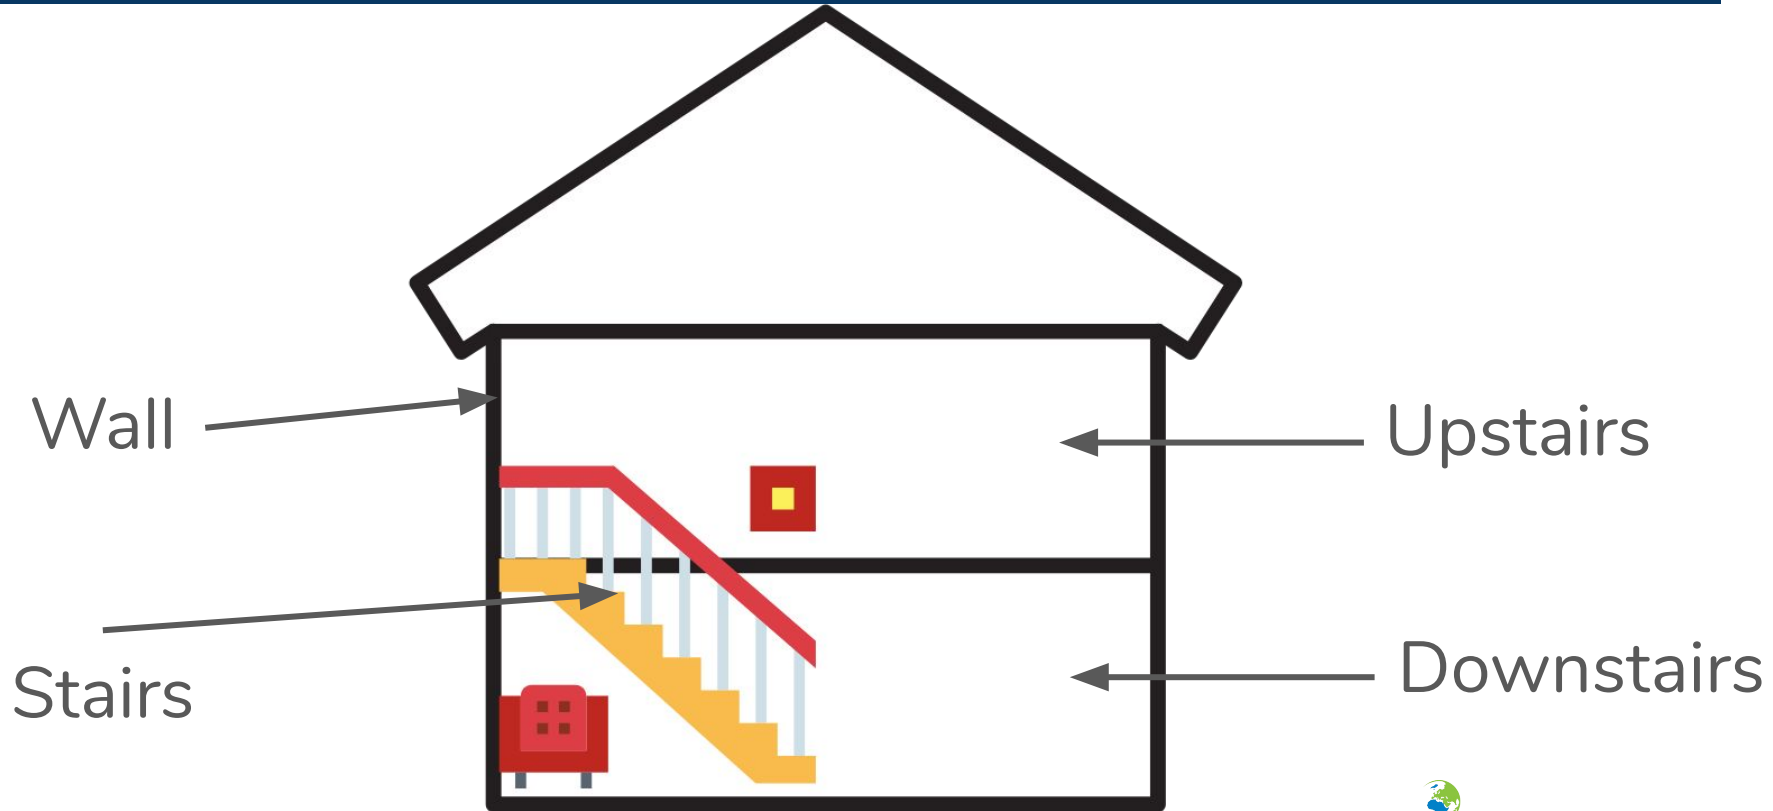

# House v Home

So far, we have used the word “house”, but you might hear the word “home” too.  
What is the difference?

**House** is more formal and there is no relationship with the building.

**Home** is more informal and expresses that a family lives there and it is the heart of the family.

# House Structure

# House Structure

If a building DOES NOT have stairs, then it is not a house, it is a **flat**. In the USA, they use the word **apartment** instead of flat.
