

Hi doctor!

Hi Kelly, how are you?

Not too good. I've had a really bad headache for 4 days now.

OK, 4 days is a long time. Any problems with your vision?

No, I can still see. It's just a cracking headache.

That's good you have no problems with your vision. Have you taken any painkillers?

Yes, I've taken paracetamol but it hasn't really helped.

Was there anything in particular that started it?

Not really but I do use my screen a lot working from home, I'm not sure if it's related?

Maybe! Staring at a screen isn't good. Let's do a quick eye test, I'll take some bloods and give you some stronger painkillers but I really recommend you get some rest.

OK, thank you doctor!

You're very welcome. If it's not cleared in another couple of days, come back in!

Good morning doctor. How are you?

I'm good thank you. How are you doing?

Not so great! I have very bad stomach ache and I've been vomiting all night.

OK, that doesn't sound good. Have you eaten anything different in the last few days?

Yes, I had some seafood last night and it's since then that I started feeling unwell.

OK, well it's possible that you have food poisoning. Could you lie down on your back please?

Of course doctor, like this?

Yes, like that. Does it hurt when I press your stomach here?

No, that doesn't hurt, it just makes me feel very sick.

OK, I recommend going home immediately, drinking lots of water, resting in bed and coming back after 48 hours.

OK, I will do that immediately
doctor.

If it gets worse over the next 48 hours,
please call me immediately!

Good afternoon doctor!

Hello there. Are you Sam?

Yes, I'm called Sam.

How can I help you today Sam?

I've had a bad cough for about one week now and I can't get rid of it.

OK, do you have any other symptoms too?

I've had a bit of a temperature too and I've been feeling really tired.

It sounds like you have flu, so I'm going to prescribe you some medicine.

That sounds good doctor. How regularly should I take it?

Take 3 tablets daily with meals. I'll write this prescription now and you can collect it from the pharmacy.

Is it the pharmacy in town on the high street?

Yes, that's right. It'll probably take about 20 minutes before it's ready for you.

That's great doctor, I'll go to the pharmacy now.

You're welcome. If it gets worse once you've finished this medicine, come back in to see me.
