Read the text below. Write the means of technology that is being discussed in the correct space.

_____

It's so easy to travel now because of this technology. You can easily type in the postcode and you'll be shown the correct directions. It's much easier to use this than an old-fashioned paper map.

A MP3 Player
B Memory Card
C USB stick
D GPS

Read the text below. Write the means of technology that is being discussed in the correct space.

Read the schedules of Sam, Irene and Paul then decide which sentence belongs to each person.

Sam

I'm an engineer and I work at *Lexicom*, an MNC. I only just started working here but I absolutely love it. I work at our headquarters, which are based in London and the top floor of the building has an incredible view of London's skyline. It's a British company but it's very international and you can hear many different languages being heard on a daily basis. As a construction engineer, I'm responsible for designing bridges and other suspension structures. I must calculate the right weight, angles and then discuss the materials and building with the architects.

Read the schedules of Sam, Irene and Paul then decide which sentence belongs to each person.

Irene

I have been self-employed for a while now and work as a language teacher in my own company but I only teach French, German, English and Spanish so I'm surrounded by these languages every day! My customers are international and want to learn how to communicate effectively in these languages. I plan the lessons, create the course content, design the materials and then teach my classes. I also need to review my students' levels to ensure they are progressing.

Read the schedules of Sam, Irene and Paul then decide which sentence belongs to each person.

Paul

I'm a production manager in a start-up so I haven't been working here for too long, just a few months. We do business in the beverages industry, we resell alcoholic and soft beverages to pubs, restaurants and other public service places. As a production manager I need to communicate effectively with our sellers and buyers to ensure we have enough materials and I have to report a lot of data on a daily basis in order to schedule deliveries and distribute the beverages correctly. I mostly work in English but we do have a few French suppliers so I get to practise some of my French too.
