

# Measurements

# Measurements

In this presentation, we're going to learn the measurements in English.

Time

Distance

Area

Speed

Capacity

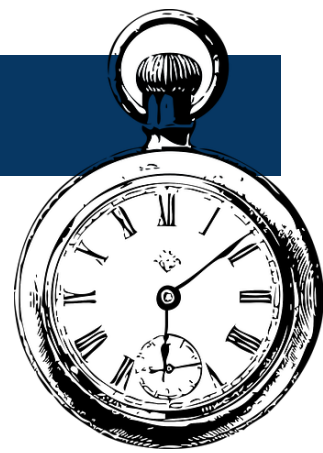

Weight

Cooking

# Measurements

## TIME

second (s)

week

minute (min)

month

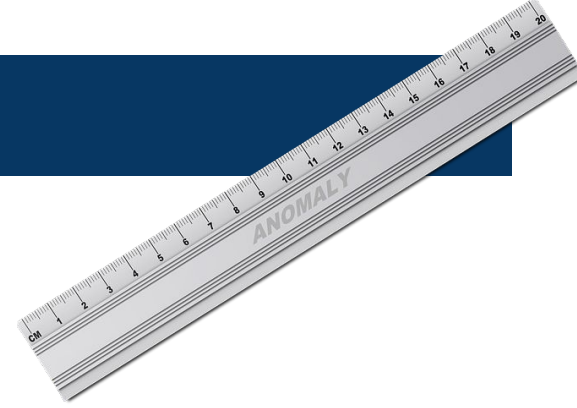

hour (h)

year

day

# Measurements

## DISTANCE

When we measure distance, we have two types of measurements; **imperial** and **metric**.

# Measurements

## DISTANCE

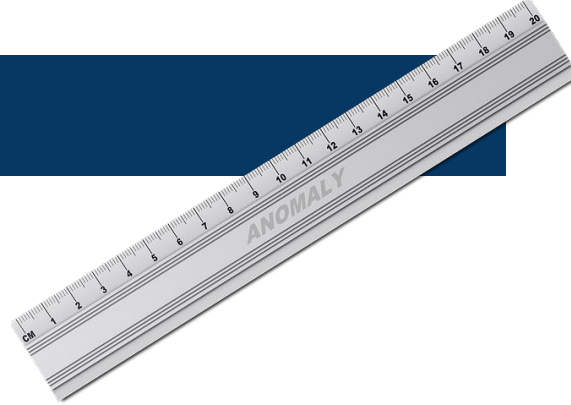

## METRIC

millimetre (mm)

metre (m)

centimetre (cm)

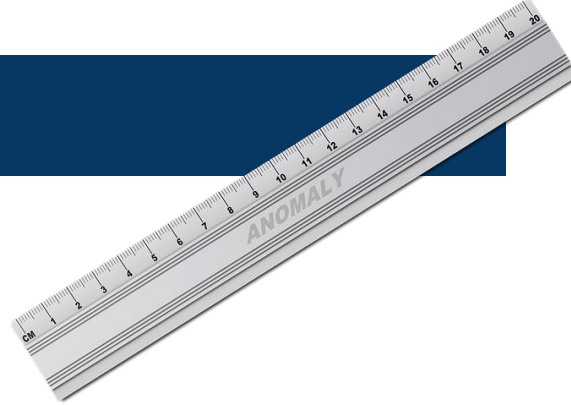

kilometre (km)

# Measurements

## DISTANCE

## IMPERIAL

inch (in) (")

chain (ch)

foot (ft) (')

furlong (fur)

yard (yd)

mile (mi)

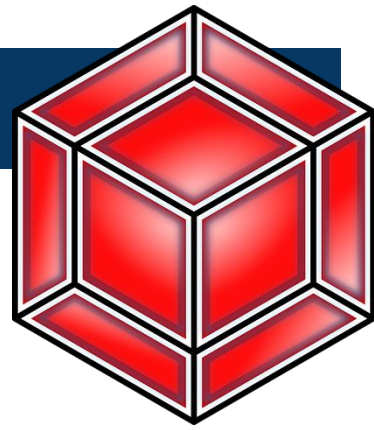

# Measurements

## AREA

When we measure area, we also have two types of measurements; **imperial** and **metric**.

# Measurements

AREA

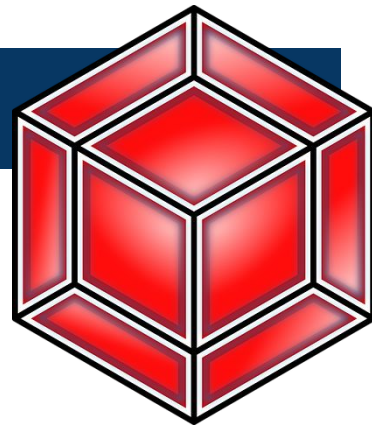

METRIC

metres squared ( $\text{m}^2$ )

hectare (ha)

# Measurements

AREA

IMPERIAL

square feet (ft<sup>2</sup>)

acre (ac)

# Measurements

## SPEED

When we measure speed, we also have two types of measurements; **imperial** and **metric**.

# Measurements

SPEED

METRIC

kilometres per second (km/s)

kilometres per hour (km/h)

# Measurements

SPEED

IMPERIAL

miles per second (mps)

miles per hour (mph)

# Measurements

## CAPACITY

When we measure capacity and volume, we also have two types of measurements; **imperial** and **metric**.

# Measurements

## CAPACITY

## METRIC

millilitre (ml)

litre (l)

centilitre (cl)

cubic metres (m<sup>3</sup>)

# Measurements

## CAPACITY

## IMPERIAL

fluid ounce (fl oz)      quart (qt)

gill (gi)

gallon (gal)

pint (pt)

# Measurements

## WEIGHT

When we measure weight, we also have two types of measurements; **imperial** and **metric**.

# Measurements

## WEIGHT

## METRIC

milligrams (mg)

kilograms (kg)

grams (g)

metric tonne (t)

# Measurements

WEIGHT

IMPERIAL

ounce (oz)

stone (st)

pound (lb)

ton (t)

# Measurements

## COOKING

There are various measurements we use in recipes too.

# Measurements

## COOKING

Teaspoon (tsp)

Tablespoon (tbsp)
