

COUNTRIES

Countries

Countries

We live on planet Earth, which is made up of land and sea. The sea creates about 70% of our planet whilst the land only creates about 30%.

We use the expression “the seven seas” to talk about the most well-known seas and oceans.

Only 30% of our planet is land, but there are 195 countries recognised by the United Nations. These countries are spread across seven continents.
